

Team Meeting

4/14/2024

4pm

Zoom meeting

Meeting called by:	Fausto Martinez	Type of meeting:	Discord Call
Facilitator:	Fausto Martinez	Note taker:	Ikechukwu Anyanwu
Timekeeper:	Ikechukwu Anyanwu		

Attendees: Ikechukwu, Fausto, Jose

Minutes

Discussion:

We decided to take a different approach on the project by collectively agreeing on giving some background information regarding our topic. As of right now, our presentation will be split up into five sections, the first three talking about generative AI, and the rest discussing the actual policy proposals. These numbers may change though.

Action items	Person responsible	Deadline
✓ Get started on unregulated use of generative AI slide	Ikechukwu	04/21/2024
✓ Get Started on policy proposal slides	Fausto	04/21/2024
✓ Get started on regulated use of generative AI slide	Jose	04/21/2024

Special notes:

Policy Suggestions:

- Mandate transparent data usage policies and consent mechanisms to empower individuals to control how their data is collected, stored, and utilized.
- A supervisor or group workers needs to be tasked to proof read AI contents after it is generated
- Collaborate and invest into educational institutions to develop relevant curriculum and training programs.

Presentation Sections:

- Intro to Generative AI
- Unregulated Use of Generative AI (talk about the negatives)
- Regulated Use of Generative AI (talk about the benefits of regulating AI)

- Policy Proposals
- Implementation of said Policies (might remove this)

New technology is now capable of communicating and making content in ways comparable to humans. It's called generative artificial intelligence (AI), and you can use it to excel in the workforce.

Generative AI can save you time, no matter what field you work in. It can create content for marketing, forecast numbers for finance, or code for software developers. Publicists can use it to write press releases. Health professionals can even use it to improve their diagnosis. You, the worker, are still in charge, you just have more freedom to strategize, think big, and excel.

Your team has been engaged by one of the largest think tanks to help propose policy suggestions to help minimize the potential negative impact on the jobs, industry and personal data.
